Appzillon Edge

Rich Functionality : All solutions in Appzillon Digital Banking provide rich in-built functionality that leverages decades of experience in building banking solutions that are cutting-edge and delightful to use at the same time.

Multi Experience Support : Appzillon uses a single code base for all supported experiences such as mobile, web, kiosk, etc. This approach makes it easy to introduce new features across channels quickly.

Personalized Experience: Appzillon includes a rich repository of personalisation elements to help deliver a user experience that is unique and personalized for each and every customer.

AI Powered: Appzillon includes a repository of machine learning models that can be seamlessly integrated into various areas such as chatbots, omni-search, etc.

Platform Driven: All solutions have been developed using Appzillon Development Platform. The platform driven approach provides unparalleled flexibility in developing, delivering, and maintaining digital solutions.

Modular: Appzillon follows a micro-app based architecture that breaks down features into granular yet fully functional units / digital assets that are reusable and modular. These can be combined together to build complex solutions.

Agile and Flexible: Appzillon uses industry standard technologies. It follows a robust and performance driven scalable architecture to support secure interactions and high volumes.

Robust Security: All solutions follow the industry benchmark for enterprise security to ensure that data security and integrity is maintained at all times with zero compromises.
